LEWIS & BARROW
Consulting Civil & Structural Engineers

PROVEN EXPERIENCE

Lewis & Barrow is a multi-disciplined Professional Consulting Engineering Firm specialising in all areas of structural and civil engineering design, documentation, project management and architectural design.

We can start with you from the beginning -

Our expertise in providing site investigation and feasibility, through the concept and development stages, leading into tender and construction of the project will ensure your project is delivered to the highest standard in the most innovative and efficient manner.

Lewis & Barrow specializes in providing affordable, innovative and practical design solutions aimed at saving the Client time and money. Computer aided drawing (CAD) is used extensively to produce high-quality, clear and accurate plans that enable projects to be built efficiently and with certainty.

Call us today to discuss your next building project!
